Education

University of Salford

BSc, Computer Science (Sep 2024 - Present)

Expected Grade: 1st Class | **Year One:** 1st Class (80.17%)

Key Modules:

- Data Structures and Algorithms (**Java**), AI and Data Mining (**Python**), Software Project with Agile Technique (**JavaScript, PHP, Unit Testing, SCRUM**), Database System (**SQL**), Computer System Internals and Linux, Design Patterns (**Java, JavaFX**), Networking and Security.

Projects

[Find A Placement – University of Salford Hack Camp](#) - Team Project
PHP, JavaScript, SQL, Git, Unit Testing, Agile/Scrum, SDLC, MVC (Client – BCS Manchester)

- Acted as Scrum Master and delivered a full-stack team project software solution for BCS Manchester at university HackCamp.
- Designed and implemented secure login systems, administrative, and career staff dashboards with database integration.
- Led a team of seven using Agile Scrum, managing sprints and task allocation through Jira.
- Managed Git version control and deployed the application to university server.

[Spring Boot Data Analysis API](#) - Personal

Java, Spring Boot, JUnit, GCP, CI/CD, Docker, Git, Linux

- Developed a REST API for data analysis of unknown data sets of CSV files, which computes column-level statistics, including null counts, unique values, min/max, median, standard deviation and more.
- Created API endpoints and a React front end allowing user upload and download analysis.
- Deployed the application on Google Cloud Platform with automated CI/CD workflow via Git-based pipelines.
- Integrated Spring JPA for data persistence, H2 in-memory database and JUnit for automated testing.

[Petwatch](#) – Academic

PHP, JavaScript, MariaDB, MVC

- A client-server full-stack PHP and JavaScript web application to help owners find their lost pets.
- Implemented and deployed the project on the university server with MariaDB database integration.
- Implemented live search, filtering, and pagination for pet listings, with OpenStreetMap integration displaying sighting locations as clustered map markers.

Technical Skills

Programming: Java, JavaScript, PHP

Back End: SQL, PostgreSQL, Spring Boot, JUnit

Front End: JavaFX, Bootstrap, Figma

DevOps/Tools: Git, Linux, GCP

Work Experience

Team Member – Tortilla

Manchester, UK (Mar 2024 – Dec 2025)

- Recognised for punctuality and reliability, including assisting colleagues by covering their shifts in urgent circumstances.
- Awarded a skill competency assessment and progress review certificate from the company.
- Provided customer service in a busy restaurant, serving 500+ customers per day.

Team Leader – Subway

Chelmsford, UK (Sep 2022 – Feb 2024)

- Organised and maintained a clean working environment as a team, improving overall workplace satisfaction for colleagues.
- Collaborated with management to handle inventory and place supply orders, reducing workload for management.
- Led and supervised a team of 10, achieving outstanding customer service standards.
- Trained and mentored new employees, enabling quick learning and engagement.

Sandwich Artist – Subway

London, UK (Jan 2022 – Aug 2022)

- Provided customer service as part of team.
- Gained subway certificates in food safety and food preparation.
- Covered long shifts, often working for 12 hours in case of urgent circumstances.

Fire Marshal – Triton Group

London, UK (April 2021 – Dec 2021)

- Handled emergency evacuation, false alarm detection, patrol, and fire hazard safety checks.
- Collaborated with the management with daily updates through writing incident reports and video call updates every shift.
- Gained hands-on practical experience in how to deal with intruders and report incidents accordingly to keep the premises safe for residents.

Leadership

Team Leader - Subway

Scrum Master – University of Salford Hack Camp

Certificate

[Software Engineering Job Simulation](#) – Skyscanner.
