Education

University of Salford, Manchester Sep 2024 – Present
BSc Computer Science

Expected Grade: 1st Class

Year One: 1st Class (80.17%)

Year Two: 1st Class (77.33%)

Key Modules: DSA (Java, Python), Client Server System (JavaScript, PHP), AI and Data Mining, Deep Learning (Keras, Python), Visual Information Analysis (Python, OpenCV)

Projects

Embedded AI Smart Kitchen Inventory Tracker

Sep 2026 – Present Code available on request
Python, PyTorch, OpenCLIP, ONNX Runtime, OpenCV, C++ (Arduino), ESP32-CAM, Raspberry Pi, Flask, SQLite, Telegram Bot API

- Developing a low-cost embedded AI kitchen inventory tracker as a final year research project.
- Integrating a battery-powered, door-triggered ESP32-CAM with a Raspberry Pi for open-set CLIP classification, OpenCV fill-level estimation and Telegram low-stock alerts.
- Investigating CLIP compression (ONNX, INT8 quantisation) for edge deployment, measuring accuracy loss on fine-grained items such as sugar, salt and flour.

Find A Placement – Group Project

University of Salford Hack Camp
PHP, JavaScript, SQL, MVC, Git, Jira, Unit Testing, Agile Scrum

- Delivered a full-stack web app for client BCS Manchester.
- Acted as Scrum Master for a team of 7, running sprints and allocating tasks in Jira.
- Built secure login and dashboards for admin and careers staff, with database integration.
- Managed Git version control and deployed the app to the university server.

Analytics Engine

Dec 2025 – Present [GitHub](#) | [Launch](#)
Java, Spring Boot, AWS EC2, JUnit 5, MockMvc, JPA, H2, DuckDB, Gradle, Docker, React, TypeScript

- Developed a data-profiling REST API in Spring Boot, designed as a reusable component for data pipelines.
- Implemented automatic column-type inference, descriptive statistics and correlation analysis for CSV, JSON and Parquet files.
- Built endpoints to retrieve, delete and export stored analyses as JSON, using SHA-256 content hashing to serve duplicate uploads from cache.
- Added Swagger/OpenAPI documentation, Spring Actuator health checks, and unit and integration tests.
- Deployed the API to AWS EC2, with a React and TypeScript front end hosted on GitHub Pages.

Work Experience

Team Member – Tortilla

Manchester, UK | Mar 2024 – Dec 2025

- Served 500+ customers a day as part of a busy restaurant team.
- Awarded the company's skills competency certificate following a progress review.
- Covered colleagues' shifts at short notice, often on the same day.

Team Leader – Subway

Chelmsford, UK | Sep 2022 – Feb 2024

- Led shifts and supervised a team of up to 6.
- Conducted stock checks, maintained inventory records on the company system and placed supplier orders.
- Onboarded, trained and mentored new staff to company standards.

Sandwich Artist – Subway

London, UK | Jan 2022 – Aug 2022

- Provided efficient customer service in a fast-paced, high-volume environment.
- Completed Subway's food safety and food preparation training.

Fire Marshal – Triton Group

London, UK | Apr 2021 – Dec 2021

- Produced incident reports and maintained accurate records on the reporting system.
- Conducted patrols, fire safety inspections and evacuations, and responded to false alarms.

Skills

Languages	Python, Java, JavaScript (TypeScript), SQL, PHP
AI / ML	PyTorch, OpenCLIP, ONNX Runtime, OpenCV
Embedded	Raspberry Pi, ESP32, Arduino
Frontend	React, Bootstrap, Tailwind CSS
Backend	Spring Boot, Flask, JPA, JUnit 5, MockMvc
Databases	PostgreSQL, SQLite, MariaDB, H2
DevOps	Docker, CI/CD, Git, Linux, AWS EC2, Gradle, Maven

Leadership

Team Leader: Subway

Scrum Master: University of Salford Hack Camp

Interests

Hiking, Football, Cricket, Music
